

## **Process Engineer / Production Supervisor**

ReVital Polymers Inc. is seeking an experienced **Process Engineer / Production Supervisor** for its Sarnia, Ontario facility. Sarnia is a family friendly city at the base of Lake Huron, with all season activities including miles of white sandy beaches, easy accessibility to major league sports teams, and recreational & cultural events.

If you are seeking a career with an innovative team where you can help North American companies improve their environmental footprint by reducing their use of non-renewable resources, then you will find ReVital Polymers a reliable career partner. We are a leading supplier of post-consumer commodity resins for the commercial, industrial and automotive industries.

### **DUTIES AND RESPONSIBILITIES**

- Ensure all personnel within the plant are working safely and efficiently in alignment with safety, environmental and legal protocols.
- Review the plant operation prior to shift crew change including review of the shift start-up checklist and address all related issues.
- Review production instructions and ensure everyone is aware of the production instructions.
- Send out production reports to the appropriate personnel and ensure production targeted goals are met.
- Ensure that daily operational equipment checks and required inspections are completed
- Manage and lead process improvement projects, support the Quality department, lead the implementation of changes to improve all operational processes and optimize labour
- Analyze manufacturing processes and equipment performance to identify continuous improvement opportunities
- Troubleshoot manufacturing issues, determine root cause and implement corrective actions to prevent future occurrence
- Assist in setting up and maintaining KPIs

- Coordinate outside contractor activities

## **KNOWLEDGE AND SKILL REQUIREMENTS**

- An Mechanical, Chemical, Industrial or Process Engineering degree
- Minimum of 3 years' demonstrated multi-disciplinary experience and knowledge in process engineering or in a production manufacturing environment;
- Strong communication and presentation skills with varied audiences
- Strong conflict resolution skills, problem solving and decision make skills.
- Familiar with basic Health & Safety Regulations
